# Work Experience

## **GIS Specialist**

### **NYC Department of City Planning**

October 2018 – Present

NEW YORK CITY

- Develop data pipelines for distribution of products within agency's internal and external platforms.
  - Datasets include: LION, MapPLUTO, Digital City Map (DCM), Zoning Features, E-Designations, Mandatory Inclusionary Housing (MIH), Building Footprints, Digital Tax
- Audit and maintain agency platforms and data quality compliance in accordance with open data mandates. Over 500+ internal and publicly facing datasets.
- Upgraded agency's ESRI infrastructure and developed recurring maintenance procedures to improve database render performance by 43%.
- Developed internal SDE monitoring process to track, visualize, and report SDE
- Developed custom ESRI License Manager portal to allow users to view license availability and request access from others.
- Maintained updates to The Guide to Planning Resources (internal web platform for sharing data resources across divisions) through combination of Microsoft Sharepoint, ArcGIS Hub, ArcGIS Online, and Github platform management.

#### **GIS Aide**

## **NYC Department of Transportation**

street asset records in server data stores.

- Contributed to development of citywide predictive Street Deterioration Model using R, SQL, and Python.
- Analyzed historical commitments for all DOT bridge, street, and facility assets to spatialize and report on funding patterns across various political boundaries.
- Managed collection and digitization of all NYC street ownership records. Worked in collaboration with Department of City Planning and respective Borough President's Topography Departments.
- Developed QA process for evaluating digitization metrics.

### **Education**

# **Hunter College**

#### M.S. in Geoinformatics

Graduated May 2018

- Ouantitative Methods in Geography
- Advanced GeoVisualization
- GeoComputation II
- Urban Applications of GIS
- Database Modeling
- GeoComputation I
- GeoWeb Services

## The City College of New York

#### **B.S. in Earth System Science**

Graduated May 2014

- Environmental Geochemistry
- Earth Systems Science

- Advanced GIS

#### Structural Geology

Modeling & Databases

# **Technical Skills**

Operating Systems: Windows, Linux, MacOS

Version Control & Project Management: Git, GitHub, ZenHub, Azure DevOps

Databases: ArcSDE, PostgreSQL/PostGIS, Microsoft SQL Server

Languages: Python, SQL, HTML, CSS, JavaScript, R

**Development Environments:** Microsoft Visual Studio Code, Pycharm, JupyterHub

Libraries & Platforms: ArcGIS Online, ArcGIS for Developers, ArcGIS Pro SDK, ArcGIS Hub, ArcPv. DigitalOcean, Carto, Leaflet, Mapbox. Cessium, GDAL, Docker, Pandas, NumPy

**Software:** ArcGIS Desktop Suite, ENVI, OGIS, Tableau, Microsoft Teams, Microsoft SharePoint

### **Certifications**

Penn State University - Graduate certification in Sustainability, Management and Policy

ESRI - Extending ArcGIS Pro w/ Add-Ins

#### **Interests**

**3D Printing** 

**Biking** 

**Cooking** 

Homelab
